SHANDON MITH

Jamaica, NY 11434 | 347-662-8106 | Shandonmith@gmail.com

Objective

To obtain a co-op position in Software Development. Available May- December 2024.

Education and Training

Bachelor of Science, Computer Science

Rochester Institute of Technology — Rochester, NY

- GPA: 3.5
- Relevant Courses: Concepts of Computer Systems, Principles of Database Management, Introduction to Artificial Intelligence.

Tools

Skills

Programming Languages

- Python
- Java
- JavaScript/TypeScript
- C#
- C/C++
- R
- SQL

Frameworks

- React
- Angular
- Vue
- Spring
- Express
- JQuery

.Net

- Linux/Unix
- Git/GitHub
- Docker
- D3
- MySQL , PostgreSQL, SQL Server
- Firebase
- Node.js
- MongoDB
- HTML
- CSS/SASS
- Bootstrap 5
- Postman

Experience

Software Developer Co-Op

Emerson — Elyria, OH

Jan 2023 to May 2023

Expected in May 2025

- Developed and debugged features for RIDGIDConnect web application using .NET and Vue frameworks.
 Created API endpoints for RIDGIDConnect's public API in .Net 6, using Swagger for documentation and Postman to test Request URLs
- Wrote unit test for RIDGIDConnect's public API
- Performed testing of new features for RIDGIDConnect in staging
- Wrote SQL scripts in Microsoft SQL server to insert data and create tables for RIDIDConnect application.
- Participated in both iteration planning and weekly standup meetings

Freelance Software Engineer

Jan 2021 to May 2021

Nielsen - Remote

- Led server-side development of the Nielsen Around the World web application with **Node.js** and **WebPack** to allow the application to compile in a deployable build.
- Worked on containerizing Nielsen's Yourls Apache application with Docker.
- Followed Agile best practices, including bi-weekly sprints, daily standup's, and documentation.

Software Engineer Intern

Jul 2019 to Aug 2019

FTI Consulting Inc. — New York, NY

- Worked with the software solutions team on data visualization.
- Designed charts and graphs using D3 and Chart. is, along with integrating them with an API database.
- Developed a web application to host multiple charts and graphs using the Angular framework.
- Followed Agile best practices, including bi-weekly sprints, daily standup's, and documentation.

Projects

Rhythm (music-app)

Cooperated with a team to built a music app that allows users to listen, search, like songs, create playlists, and get recommendations. We built a fullstack web application using PostgreSQL as our database, Node.js and Express.js to create a Rest API for our backend, and React for our frontend. CourseWork (e-commerce site)

Worked with a team to design and maintain an e-commerce site that sells courses. Utilizing the **Spring Boot Java framework** and **MongoDB** to design a **Rest API** for our backend, along with **Angular** for our frontend. Our site allows the admin to create, edit, and delete courses and for customers to buy them.
